

Elite Ti — Event-Based Sales & Marketing Plan

A 12-month playbook for turning Elite Ti's biggest sales driver — **events and group buys** — into a repeatable, calendar-driven engine. Built to give the marketing team a clear "what are we promoting this month and where do we post it" answer every single week.

Why this plan exists

Elite Ti's largest revenue events are tied to **group buys, new-product launches, and seasonal / car-community moments**. Right now those happen opportunistically. The goal here is to schedule **at least one — ideally two — promotable events every month**, so the marketing agent always has something to tease, launch, and follow up on.

What the data says (last 12 months)

Pulled from Shopify analytics, June 2025 → June 2026:

Insight	Number	What it means for us
Total sales (trailing 12mo)	~\$380K	Healthy, but lumpy — driven by spikes, not steady flow
Biggest spike	Mid-March 2026: ~\$81K across 2 weeks	Tax-refund season + the SC300/SC400 door card pre-order. This is the template.
Other big spikes	Mid-April (~\$23K), Black Friday/Cyber week (~\$25K), August (~\$11K)	Predictable windows — load big events into them
Top product	SC300/SC400 Door Cards PreOrder — \$31K / 24 orders	A pre-order group buy is our single best revenue tool
Average order value	~\$1,000-\$1,240	High-ticket. Buyers research and commit. Email/SMS + group buys > impulse discounts
Social referral sales	\$117K / 99 orders (\$1,022 AOV)	Our #1 identifiable channel. Justifies serious investment in social distribution
Search referral sales	\$39K / 54 orders	SEO + paid search is an under-developed second channel

Three core platforms drive nearly everything we sell:

- **Mazda RX-7 (FD3S)** — carbon interior trim, rear seat delete, headlights, hoods, door sills
- **Toyota Supra (MK4 / A80 / JZA80)** — body kits, hoods, AC kits, door cards, dashes
- **Lexus SC300/SC400 (Soarer / Z30)** — door cards, window trims, and the upcoming door trim / door card group buy

How to use this repo

File	For	Contents
docs/event-sales-calendar.md	Nate + marketing	Rolling 12-month calendar — 1-2 events per month, mapped to products and proven spike windows

File	For	Contents
docs/group-buy-playbook.m d	Whoever runs a buy	The repeatable mechanics: tiers, MOQ, deposits, timeline, and the two confirmed buys (SC300/SC400 + Sevens Day)
docs/marketing-distribution -plan.md	The marketing agent	Channel map, content cadence, tools beyond Metricool, what access to grant, and KPIs

The two events already locked in

- 1. SC300/SC400/Soarer Door Trim + Door Card Group Buy** — launching end of June 2026. List pricing: ~\$900 door trims, ~\$1,400 door cards (in line with the Supra door cards; includes the handle and hardware). See the playbook.
- 2. Sevens Day (7/7)** — RX-7 promo: **10-15% off RX-7 orders over \$1,000** (hoods, interiors, etc.). See the calendar + playbook.

Maintained by Elite Ti. Update the calendar quarterly as new products and group buys come online.

Elite Ti — 12-Month Event & Sales Calendar

Goal: at least one major promotable event every month, with a second smaller "flash / engagement" beat whenever possible. Big swings are deliberately loaded into our proven spike windows (tax-refund Feb-April, Black Friday Nov, and August).

Event types (the building blocks)

Type	What it is	Cadence	Revenue role
Group Buy	Pre-order with tiered pricing + MOQ unlocks. New or made-to-order product.	~Quarterly major	Biggest revenue driver. See playbook.
Model Day	% off for one platform on a themed date (e.g. Monthly-ish Sevens Day for RX-7).		Engagement + clearing in-stock inventory
Seasonal / Retail	BF/CM, holiday, Memorial Day, tax season. Storewide or category.	Tied to calendar	Predictable spikes
Event Tie-In	Content + sale around an industry moment (SEMA, Tokyo Auto Salon).	A few/year	Reach + hype, content fuel
Flash / Engagement	48-72hr restock, bundle, giveaway, or last-call.	Filler beats	Keeps the audience warm between big events

Pricing guardrails (high-AOV, considered purchase)

- We do **not** need deep discounts. 10-15% off, bundle value, or group-buy tier pricing is plenty — buyers commit on product, not on coupons.
- Protect margin: prefer **threshold offers** ("X% off orders over \$1,000"), **bundles**, and **group-buy tiers** over blanket storewide percentages, except for Black Friday.
- Always set a **clear deadline**. Scarcity + a countdown is what converts this audience.

Rolling 12-month calendar (starting now)

Legend: ● Primary (the big promotable event) · ○ Secondary (smaller flash/engagement)

June 2026

- ● **SC300/SC400/Soarer Door Trim + Door Card Group Buy — LAUNCH (end of month)**. The marquee event. Door trims ~\$900, door cards ~\$1,400 (incl. handle/hardware). Tease all month, open pre-order with tiered pricing + MOQ unlocks. (See *playbook*.)
- ○ **Summer Build Season kickoff / "Treat Yourself" weekend** — light flash on in-stock RX-7 + Supra interior pieces to bridge to the group buy.

July 2026

- ● **Sevens Day (7/7) — RX-7 event**. 10-15% off RX-7 orders over \$1,000 (hoods, interiors, headlights, rear seat delete). Run **July 5-9** with a 7/7 peak. Heavy RX-7 content week.
- ○ **Car-show season bundle (late July)** — "get show-ready" RX-7 / Supra exterior + interior bundles at a packaged price. SC300/SC400 group-buy tier-update content continues.

August 2026

- **Late-Summer Restock / Group Buy fulfillment event.** August is historically strong (~\$11K spike week). Restock the top sellers (door sills, dash mounts, window trims) and run a "back in stock" push + a secondary group buy if a new product is ready.
- **End-of-summer flash** — 48hr bundle on Supra cooling panels / AC kits (hot-weather tie-in).

September 2026

- **Fall New-Product Drop / Supra-focused Group Buy.** Target a Supra item (hood, body kit, or dash) for a Q4 group buy so it fulfills before the holidays.
- **"JDM Heritage" week** — content + small promo. RX-7 FD, Supra A80, and SC/Soarer all trace to the early-90s; lean into the legacy story to drive engagement and saves/shares.

October 2026

- **Pre-SEMA Group Buy + build teasers.** SEMA is early November — build anticipation, reveal what's coming, and open a pre-order to capture the hype. Strong content month.
- **"Spooky season" limited carbon drop (Halloween)** — small limited-run or blacked-out cosmetic flash, 72hr.

November 2026 — biggest month, plan the whole month around it

- **BLACK FRIDAY / CYBER MONDAY.** Our one true storewide sale of the year (~\$25K window last year). Tiered storewide discount + bundle deals + free shipping thresholds. Build a countdown all month; open early-access to email/SMS subscribers.
- **SEMA reveals (first week of Nov)** — content-forward: show product on SEMA builds, ride the industry buzz, then roll straight into Cyber Week. Extend deals through **Cyber Week**.

December 2026

- **Holiday Gift / Year-End "Last Call."** Push **gift cards** and lower-ticket items (door sills, IC7 dash mounts, trim, cooling panels) as gifts. Last-chance-before-price-changes framing.
- **Year-End Clearance + "New Year, New Build" teaser (Dec 26-31).** Dec 29 spiked ~\$8K last year — close the year hard and tee up January's project-car energy.

January 2027

- **Tokyo Auto Salon tie-in (mid-Jan) — "TAS Special."** JDM's biggest show. Heavy content
- a themed sale; this audience is glued to TAS coverage. Great moment for a Supra or RX-7 drop.
- **"New Year, New Build" Group Buy kickoff** — open a project-car season pre-order; people are planning builds for spring.

February 2027 — tax-refund season begins (our proven big window)

- **Tax-Refund Season Group Buy / Pre-order LAUNCH.** Feb-April is historically our biggest stretch (March 2026 did ~\$81K). Open a major group buy early to capture refund dollars as they land. This should be the **biggest single planned event after Black Friday**.
- **Valentine's "Treat your other love" flash (Feb 14 week)** — RX-7 / Supra interior pieces.

March 2027 — peak spike window

- **Tax-Season Blowout + New Launch.** Mirror what drove the ~\$81K: a flagship group buy hitting its tiers + a fresh launch + fulfillment momentum. All-hands marketing month.
- **"Mad March" mid-month flash** — restock + bundle on the season's hottest sellers.

April 2027

- **Spring Group Buy / New Product Launch.** April 13 did ~\$23K last year — keep the tax-season momentum with a spring drop before refunds dry up.
- **Spring car-show season kickoff bundle** — "get show-ready" packages, exterior + interior.

May 2027

- **Memorial Day Weekend Sale (last Mon of May).** Storewide seasonal sale that kicks off the summer build + show season. Strong, recognizable retail moment.
- **Pre-summer restock flash** — make sure the top sellers are stocked before show season.

Owned "Model Days" we can build into traditions

Sevens Day already works for RX-7. Standing themed days give the agent recurring, ownable beats:

Day	Date	Platform	Notes
Sevens Day	7/7	RX-7 (FD3S)	Established in the RX-7 community. Our anchor RX-7 event.
Rotary / 13B Day	propose 1/3 or 3/13	RX-7 / rotary	Secondary rotary-culture beat we can own
SC / Soarer Day	propose ("SC3/SC4")	3/4 SC300/SC400	Cute, ownable — ties to the Soarer crowd; lands in tax season
A80 / 2JZ Day	propose 8/0 → use Aug or 2/? or anchor to TAS/SEMA	Supra MK4	No universal date — easier to anchor Supra promos to TAS, SEMA, and bundles

Recommendation: firmly own **Sevens Day** and **SC/Soarer Day (3/4)** first, since each maps cleanly to a core platform and a good calendar slot. Add the others once they have traction.

Industry / show anchors for content (recurring)

- **Tokyo Auto Salon** — mid-January. JDM mecca; massive content + sale opportunity.
- **SEMA** — first week of November. Industry buzz; pairs into Black Friday.
- **Summer meet/show circuit** — Wekfest, Import Alliance, Final Bout, local meets (May-Sept): great for UGC, "spotted our parts in the wild," and show-ready bundles.

Operating rhythm

- **Quarterly:** Nate locks the next quarter's primary events + which products/group buys feed them.
- **Monthly:** marketing builds the content calendar for the month's primary + secondary event.
- **Weekly:** one "what are we promoting and where" stand-up note (can be async in Metricool/Slack).
- Every event runs the **4-beat arc:** Tease → Launch → Mid-point update (tier unlock / last 48hr) → Close + follow-up (fulfillment content, "missed it? join the list"). Details in the group-buy playbook.

Elite Ti — Group Buy Playbook

Group buys are our single best revenue tool (the SC300/SC400 door card pre-order alone did **\$31K / 24 orders**). This is the repeatable system so any group buy runs the same proven way.

Why group buys work for us

- **High-ticket, made-to-order parts** — pre-orders let us validate demand and fund production before committing capital.
- **Scarcity + deadline + community** — this audience commits when there's a clear window and they see others joining. Tier unlocks turn buyers into recruiters ("we're 3 away from the next price drop — tag a friend").
- **Captures big-ticket money in waves** — pairs perfectly with proven windows (tax-refund season, post-holiday build season).

The mechanics

1. Pricing tiers (MOQ unlocks)

Reward early + collective commitment. Example structure (adjust per product):

Tier	Trigger	Buyer price
Founding / Early Bird	First N orders OR first 72 hrs	Lowest price
Group Buy	Standard window	Mid price
List	After the buy closes / in-stock	Full list price

For the SC300/SC400 buy, the early group-buy participants already got the lowest pricing. This round runs at **list**: ~\$900 door trims / ~\$1,400 door cards. Frame it honestly — "early-buy pricing has closed; this is your last chance before retail/in-stock pricing."

2. Minimum order quantity (MOQ)

Set the unit count needed to greenlight production. Show progress publicly ("18 / 25 committed"). If MOQ isn't hit by the deadline, either extend once or refund deposits.

3. Deposit vs. paid-in-full

- **Deposit model** (e.g. 50% down) lowers the barrier on \$1K+ items and widens the funnel.
- **Paid-in-full** simplifies accounting and signals serious demand.
- Recommend **deposit** for new/unproven products, **paid-in-full** for repeat buys with a known fulfillment timeline.

4. Timeline (the 4-beat arc)

Beat	Timing	Action
Tease	1-2 weeks before	Spec sneak peeks, "something's coming," collect email/SMS sign-ups for early access
Launch	Day 0	Open pre-order, post everywhere (see distribution plan), email/SMS blast, pin in groups
Mid-point	~Halfway	Tier-unlock / MOQ progress update, customer questions, "X away from next tier"
Last call	Final 48 hrs	Countdown, scarcity, final email/SMS, "closing Sunday"

Beat	Timing	Action
Close + follow-up	After	Thank-you, production timeline, fulfillment content, "missed it? join the list for the next run"

5. Set expectations on lead time

State production + ship timelines up front on the product page and in every post. Reduces support load and chargebacks on made-to-order items.

Confirmed buy #1 — SC300/SC400/Soarer Door Trims + Door Cards

- **Launch:** end of June 2026.
- **Products:** new door trims + door cards.
- **Pricing (list, this round):** door trims ~\$900; door cards ~\$1,400 — in line with the Supra door cards because it includes the **handle and hardware**.
- **Positioning:** early group-buy pricing has closed; this round is list pricing before in-stock. Emphasize the door cards include everything (handle/hardware) to justify vs. trims.
- **Where to push:** SC300/SC400 + Soarer Facebook groups and forums (clublexus SC300/400, SC300.org), Instagram, email/SMS. The door card pre-order proved this audience converts.
- **Suggested mechanics:** paid-in-full or 50% deposit; show MOQ progress; 2-week tease → open → mid-point tier/MOQ update → last-48hr close.

Confirmed buy #2 — Sevens Day (RX-7)

- **Date:** 7/7 (run **July 5-9**, peak on the 7th).
- **Offer:** **10-15% off RX-7 orders over \$1,000** (hoods, interiors, headlights, rear seat delete, door sills, etc.). Threshold offer protects margin and lifts AOV.
- **Type:** not a pre-order — an **in-stock Model Day** to move catalog and drive engagement.
- **Where to push:** RX-7 FD3S Facebook groups, rx7club.com, r/rx7, Instagram. Lead with RX-7 hero builds and the rotary community angle all week.

Group-buy checklist (copy per event)

- [] Product + pricing tiers + MOQ confirmed by Nate
- [] Deposit vs. paid-in-full decided
- [] Production + ship lead time confirmed and written on the page
- [] Shopify product / pre-order page live (with UTM-ready link)
- [] Deadline + countdown set
- [] Tease content scheduled (1-2 wks out)
- [] Launch posts queued across all channels (see distribution plan)
- [] Email/SMS early-access + launch blasts drafted
- [] Group / forum posts prepared (and vendor-posting rules checked)
- [] Mid-point + last-48hr updates scheduled
- [] Close + fulfillment follow-up planned

Elite Ti — Marketing & Distribution Plan

For the marketing agent. Answers: **where do we post, how often, with what, and what tools / access do we need** to make the event calendar actually drive sales.

Current state: everything runs through **Metricool**. Metricool is great for scheduling and analytics on IG/FB/TikTok and a link-in-bio — but it **cannot post into Facebook Groups or forums**, which is exactly where our highest-intent buyers live. This plan keeps Metricool as the hub and fills the gaps around it.

What the data tells us about distribution

- **Social drives \$117K / 99 orders (\$1,022 AOV)** — our #1 identifiable channel. Lean in.
- **Search drives \$39K / 54 orders** — a real, under-developed second channel (SEO + maybe paid).
- A large chunk of sales show as **direct/unattributed** — almost certainly group/forum/DM traffic and people typing the URL after seeing us in a community. **We need UTM links** to finally see what's actually working (see "Attribution" below).

1. Channel map — where our buyers actually are

Ranked by fit for a high-AOV JDM parts brand:

Channel	Role	Notes
Instagram (Reels, carousels, stories)	Primary reach + brand	Build features, new drops, group-buy countdowns. Reels for reach, stories for urgency.
Facebook Groups	Highest-intent for group buys	RX-7 FD3S groups, Supra MKIV/A80 groups, SC300/SC400 + Soarer groups. Where pre-orders convert. Metricool can't post here — handle manually / community manager.
Forums	Deep-intent, long shelf life	rx7club.com, supraforums/mkiv.com, clublexus (SC300/400), SC300.org. Vendor sections + group-buy threads. Evergreen SEO value too.
Email + SMS	Owned audience — biggest current gap	Critical for \$1K+ AOV and group-buy early access. Not really owned by Metricool — add Klaviyo.
TikTok	Top-of-funnel reach, younger	Short build/install content. Schedule via Metricool.
YouTube (Shorts + long-form)	Trust + SEO + evergreen	Install guides, build features, manufacturing (titanium/carbon) story. Shorts repurpose Reels.
Reddit	Niche reach, careful	r/rx7, r/supra, r/Lexus, r/JDM. Self-promo rules are strict — lead with value, not ads.
Discord	Community / retention	A server turns one-time buyers into a warm group-buy audience we control.
Facebook Page	Hub + retargeting base	Lower organic reach, but needed for ads/retargeting and group credibility.

Priority order to fix the gaps: (1) Email/SMS (Klaviyo), (2) systematic Facebook Group + forum posting, (3) UTM attribution, (4) Discord community, (5) paid search/SEO.

2. Content pillars + cadence

Rotate these so the feed isn't all "buy now." Target ~4-6 posts/week per primary channel.

Pillar	What	~Mix
New drops / product hero	Clean product shots, specs, "now available"	25%
Build features / UGC	Customer cars running our parts, reposts, tags	25%
Group buy / event	Countdowns, tier-unlock progress, last-call	20%
Tech / install	How it fits, install clips, fitment confidence	15%
Behind the scenes	Titanium/carbon manufacturing, packing, the craft	10%
Community / engagement	Polls, memes, "which build wins," questions	5%

Per-event content arc (mirrors the group-buy 4-beat): Tease → Launch → Mid-point update → Last 48hr → Close/fulfillment recap. Every primary event in the calendar should get this full arc across IG + Groups + Email/SMS at minimum.

3. Tooling — keep Metricool, add the gaps

Tool	Status	Purpose
Metricool	✓ Have	Hub: IG/FB/TikTok, link-in-bio. Keep it. schedule analytics,
Klaviyo (or Shopify Email + SMS to start)	+ Add — top priority	Email/SMS flows: abandoned cart, post-purchase, group-buy early access, win-back. Highest ROI gap for a \$1K-AOV store.
Canva (Brand Kit)	+ Add	Consistent creative, templated countdowns/tier graphics for fast turnarounds.
Group-buy landing page	+ Add	A Shopify page (or Linkpop/link-in-bio) that aggregates the active event + UTM links to share into groups.
Discord	+ Consider	Owned community for repeat group-buy demand.

Tool	Status	Purpose
Meta Business Suite / Ads Manager	+ Consider	Retargeting warm visitors + lookalikes off our buyer list. High-AOV justifies modest ad spend.
A forum/group posting routine	+ Process, not tool	Metricool can't post to FB Groups/forums. Maintain a group/forum list + a manual posting cadence (or a community manager who has posting access).

Note on Facebook Groups: there's no clean automation — most groups require manual, human posting and many gate vendor posts. The realistic fix is a **maintained list of target groups + a manual posting checklist per event**, owned by the agent or a community manager.

4. Access to grant the marketing agent

To run all of the above, give her:

- **Metricool** — already has it.
- **Klaviyo** (once set up) — email/SMS campaigns + flows.
- **Shopify staff account (limited)** — to pull product links/images, create discount codes, and build group-buy landing pages. Scope permissions; she doesn't need finance/customer PII.
- **Canva Brand Kit** — logo, fonts, colors, templates.
- **Shared brand asset library** (Google Drive folder) — product photography, build photos, logos, the calendar + this playbook.
- **Meta Business Manager — partner/limited access** — to the FB Page, IG, and Ads Manager (so access is revocable and doesn't expose personal logins).
- **The target group/forum list + group-buy SOP** — so posting is consistent every event.

5. Attribution — stop flying blind

A big chunk of revenue is "direct/unattributed." Fix it so we know what's working:

- **UTM-tag every link** the agent shares. Standard format:
?utm_source=instagram&utm_medium=social&utm_campaign=sevens-day-2026
- utm_source = platform (instagram, facebook_group, rx7club, email, sms, tiktok)
- utm_medium = social / forum / email / sms / referral
- utm_campaign = the event (e.g. sc300-doorcard-gb, sevens-day-2026, bfc-m-2026)
- Build links with a UTM builder (or a saved Canva/Sheets template) and use them everywhere — link-in-bio, group posts, email, forum signatures.
- This turns Shopify's generic "social \$117K" into **per-platform, per-campaign** numbers, so we can double down on what converts (likely Groups + Email) instead of guessing.

6. KPIs + reporting rhythm

Report weekly (Metricool + Shopify), reviewed monthly:

KPI	Why
Revenue by UTM source/campaign	Which channels + events actually drive sales
Email/SMS revenue + list growth	Owned-audience health (currently near zero — should climb fast)
Engagement rate + saves/shares per pillar	What content earns reach in this community
Group-buy: sign-ups → orders, MOQ progress, tier conversion	Whether events are pacing
Follower growth per platform	Top-of-funnel health

KPI	Why
AOV + returning-customer rate	High-ticket repeat behavior

Cadence: weekly async report (what posted, what performed, next week's plan) → monthly review vs. the calendar → quarterly reset of channels/tools with Nate.
